

FIG. 1

FIG. 3

FIG. 3 is a schematic diagram of a circular device with a central hub (23) and multiple radial arms (10, 11, 12, 13, 14, 15) extending to a peripheral ring (10). The device includes a central hub (23) and a peripheral ring (10) with a series of circular elements (11, 12, 13, 14, 15) arranged around it. The central hub (23) is connected to the peripheral ring (10) by a series of radial arms (10, 11, 12, 13, 14, 15). Each radial arm (10, 11, 12, 13, 14, 15) contains a series of small circles (16, 17, 18, 19, 20, 21, 22) and is labeled with a number (10, 11, 12, 13, 14, 15). The peripheral ring (10) is also labeled with a number (10). The central hub (23) is labeled with a number (23). The diagram shows a complex arrangement of components, including a central hub (23) and a peripheral ring (10) with a series of circular elements (11, 12, 13, 14, 15) arranged around it. The central hub (23) is connected to the peripheral ring (10) by a series of radial arms (10, 11, 12, 13, 14, 15). Each radial arm (10, 11, 12, 13, 14, 15) contains a series of small circles (16, 17, 18, 19, 20, 21, 22) and is labeled with a number (10, 11, 12, 13, 14, 15). The peripheral ring (10) is also labeled with a number (10). The central hub (23) is labeled with a number (23).
